PLUS POINT

WE MAKE YOUR CLEANING EASIER

Plus Point is the leading Cleaning & Maintenance Company in Dubai specialize in cleaning, disinfecting, industrial cleaning and purification systems. As per recent study shows the market size for cleaning services in UAE had been around \$2.3 Million which means numerous businesses are running out there providing commercial and non-commercial cleaning services but one thing which we had observed to be missing from most of those cleaning services was their disregard for environment and professionalism while cleaning.

These two areas became an even greater concern and we can proudly state that our professional teams had these concerns in their processes right from the beginning, which makes us the best option for our clients. Our focus has always been to help commercial, residential, and industrial sector organizations buildings to keep their environment clean and eco-friendly in a way that would make them love their place. Our commitment helped us in delivering satisfaction through our professional and secure services in a guaranteed way and we are looking forward to expanding the benefits of our services to other areas of the world as well.
